LLCD Dredging Priorities and Funding Resolution

WHEREAS, The Lake Lemon Conservancy District (LLCD), bound by its District Plan, is tasked with maintaining recreational potential and providing works of improvement on Lake Lemon.

WHEREAS, significant sediment deposition in Lake Lemon has decreased the boatable area of Lake Lemon, resulting in significant loss of depth, and presents recreational hazards in high traffic areas.

WHEREAS, the LLCD strives to serve its freeholders and general public in the most equitable way possible, including sediment management and removal measures.

WHEREAS, the LLCD has expended significant time and funding to remove over 100,000 cubic yards of sediment from Dock Access Areas and Boating Channels.

WHEREAS, the LLCD will no longer dredge Dock Access Areas, defined as areas less than 60' away from shore, with water depth less than 4' at normal pool, nor Boating Channels, defined as Narrow channels which provide access to the main body of the lake

FURTHERMORE, the LLCD will focus dredging expenditures and future efforts on Boating Safety Areas, defined as areas greater than 60' away from the shoreline with water depths less than 5' feet at normal pool.

FURTHERMORE, future Boating Safety Area dredging projects, as previously defined, will be assessed on funding availability, project impact, and disposal site availability. LLCD will strive to focus on large scale, common use area projects posing a recreational safety hazard.

FURTHERMORE, the LLCD will issue permits for qualified private dredging companies to provide dredging for Dock Access Areas and Boat Channels as previously defined, costs to be incurred by the benefitting parties.

IT IS THEREFORE RESOLVED AND ESTABLISHED that the LLCD Board of Directors adopts the aforementioned conditions regarding future LLCD Funded Dredging Projects.
